DIGIMAP

UNIVERSITY OF
STIRLING

Creating and Using Digital Maps with DIGIMAP

Tuesday 20th May 2003
2pm – 4.30pm

Cottrell 4Z9

Facilitator:

Dr Sandy Winterbottom
Lecturer—Environmental Science

The **target audience** for this workshop is Academic, Research and other staff interested in using digital maps in their University work.

Note: If you wish to access the service after this session you will need a personal Athens username and password. Go to <http://www.library.stir.ac.uk/refdesk/Athens.html> or contact the Information Centre.

You will also need to be registered with DIGIMAP which you can do online at: <http://digimap.edina.ac.uk/selfregistration.html> or by contacting the site representative (s.j.winterbottom@stir.ac.uk)

The Edina DIGIMAP service provides users with online access to a range of Ordnance Survey data sets. These can be used to create custom maps using the online facility or can be downloaded for input to a GIS (Geographic Information System) package for more advanced mapping and spatial analysis.

Aim

The aim of this session is to outline the data-sets and services available through DIGIMAP and how to use them.

OBJECTIVES:

At the end of the workshop participants will be able to:

- Understand what DIGIMAP is
- Know what data is available
- Recognise how it differs from other 'free' online mapping services
- Create custom maps
- Save and print maps
- Understand how DIGIMAP can be used for teaching and research
- Be aware of the advanced services offered by DIGIMAP including data download.

* Please note: This session does not include hands-on experience of the Digimap Service

I have discussed attendance with my head of department or supervisor, as appropriate. I want to attend Getting on Track with DIGIMAP on Tuesday 20th May

Name:

Department

Telephone/Email:

We wish to ensure that participants will gain as much benefit as possible from attendance at training events, so if you have any individual needs in the areas of: access, mobility, communication, course materials or diet, please specify below or contact the office to discuss your needs.

Please return this form to:
Training & Development Unit, by 9th May 2003

The number of places is limited and will be confirmed prior to the event.

Registrations for training events are recorded on the University's electronic personnel /payroll system and will form part of your personnel record
