

TRAINING PROGRAM FOR YOUNG PROFESSIONALS (TPYP-3)

Aquaculture Training Opportunity (10 positions available, Starting from May 15,2023)

Application Details:

Deadline: April 25th, 2023

Shortlisting and interview: 26th April 2023 - 6th May 2023.

Reporting time for selected Trainees: 15th May 2023.

Submit applications to:

Irene Tay (Flosell Farms) at tayphapha@gmail.com.

Funded by: World Initiative for Soy in Human Health (WISHH) and Flosell Farms, LLC.

Duration: 15th May to 3rd September

Description: Ten (10) commercial-aquaculture trainee positions will be available beginning 15th May 2023. Location of internship will be at Flosell farms, LLC (Sogakope, Ghana). The training comes with a stipend and will also give students an opportunity to learn skills associated with the operation of a commercial tilapia farm. Some of the skills include fish biology, brood fish management, larval and juvenile fish rearing, fish disease management, water quality management and culture system operation. Additionally, selected candidates will take part in lectures and seminars conducted physically and virtually on topics associated with successful fish farming practices.

These seminars will be conducted by WISHH aquaculture consultants who have teaching experiences from various universities around the world. Trainees will also be required to write a summary paper of skills and lessons obtained during this learning experience to receive final payment. Certificate of training will be issued.

Benefits: Trainees will receive a stipend of an amount of \$400 (USD; payable in 2 installments) plus lodging, 1 meal per day, and some local travel for the term of the internship.

Application Requirements: Applicants must be either enrolled and in good academic standing at any credible university (University of Ghana, University of Cape Coast, Kwame Nkrumah University of Science and Technology, etc.) and at least a Junior (60/5 of class work completed) or recently (within 3 years) graduated from the university or an agricultural college.

Applicants must have excellent English Language skills and should submit a letter of application detailing experience in aquaculture, reasons for applying for this internship, and career goals. Additionally, a letter of recommendation must be submitted. Candidate applications will be assessed by WISHH and Flosell Farms and interviews completed before final selection. Selected applicants will be required to provide their own transportation to Ghana and meet immigration requirements (Foreigners) and those from Ghana will also be required to cater for their own transportation to the training site. Application opens on 12th April 2023.

Women are especially encouraged to apply.
