**1<sup>st</sup> Meeting of the Forum of Parties Involved in the  
Development of the Basin  
18 – 19 January 2012  
REPORT OF THE MEETING**

**Introduction**

The first meeting of the Forum of Parties Involved in the Development of the Volta Basin was held in Ouagadougou on 18 – 19<sup>th</sup> January 2012 at the Joly Hotel under the distinguished patronage of the Chairman of the Council of Ministers of the Volta Basin Authority (VBA). The meeting was attended by 4 representatives each from the 6 riparian countries, organizations from the basin, technical and financial partners as well as representatives from the VBA (The attendance list is in Annex 2).

**1. Opening Ceremony**

The Acting Executive Director of the VBA, Dr. Charles BINEY, the representative of France, Mr. Christophe BARAT (AFD), and Mme Sandrine SANKARA, who represented the Chairman of the VBA Council of Ministers (unable to attend) made speeches during the opening ceremony. The Envoy of the European Commission, also unable to attend, regretted his inability to send a representative.

In his welcome address, the Acting Executive Director underlined the fact that out of the 05 permanent organs as defined by the VBA's convention, which was signed in 2007, the Forum of Parties was the only one which was not yet operational and that the VBA had initiated the operationalisation process in June 2011 by addressing a request to the states to nominate 03 members to constitute, with the National Focal Point, the present Forum of Parties. He then thanked the states for their responses and was also grateful to the Partners, namely- AFD, RIOB, the Seine Normandie Water Agency, the European Union Delegation, and the French Embassy in Burkina – for their financial support, which made it possible to organize this 1<sup>st</sup> meeting. Finally, he urged the participants to participate actively in the discussions so that the meeting would be a platform for the exchange of ideas to the benefit of the water resources management, and also to the benefit of the socio-economic development of the basin and regional integration.

In his speech, the representative of France was happy that this first meeting of the Forum of Parties Involved in the Development of the Volta Basin had become a reality. He further noted that the event was an important step towards better management of the regional water resources and a sustainable

development in the Volta Basin. Touching on the restructuring process in institutions for basin management, Mr. Christopher BARAT stressed the importance of France's support for the institutional and organizational development of the VBA since its creation, without belittling the important realizations achieved by the VBA up to the holding of the present Stakeholders' Forum, which marks the starting point of the Project on Capacity Building of the Key Organs of the VBA - the Forum of Parties, Committee of Experts and Executive Directorate, which was developed in partnership with AFD, the EU Water Facility and the Seine-Normandie Water Agency.

The meeting was then opened with a speech by the representative of the Chairman of the Council of Ministers who underlined the importance of the basin to the 6 states which share it, thereby insisting on the necessity of a concerted management which justifies the setting up of the present "Stakeholders Forum", one of the 5 key organs of the VBA. Before the deliberations began, a general overview of the program (Annex 1) was presented to the participants, and a meeting secretariat established, chaired by the Acting Executive Director of the VBA, Dr. Charles BINEY.

It is also important to note the highly appreciated presence of the President of the Global Water Partnership, West African who exhorted participants to play their roles effectively at the gathering.

### **Composition of the Secretariat:**

**Chairman:** Dr. Charles BINEY Acting Executive Director of the VBA

**Francophone Rapporteur:** KASSA Prosper, member of the PNE TOGO.

**Anglophone Rapporteur:** Richard TWUM, Chairman of Ghana Dam's Dialog;

Assisted by:

Alain BERNARD, Deputy Permanent Technical Secretary of RIOB

Alain HUSSARD, Technical Advisor, VBA

## **2. Working Session – Day 1**

3 sessions were held as follows:

### **1. Session 1 : Presentation of the VBA (by the VBA)**

*1.1 Presentation of the VBA: Statutes and Mandates, Strategic Plan, Role and Responsibilities of Forum of Parties (by the Ag. Deputy Executive Director.)*

*1.2 Context and Objectives of the 1<sup>st</sup> Forum of Parties (by the Ag Executive Director.)*

### **2. Session 2: Participative Management, Sharing of Experiences**

*2.1 Ghana Dams Dialogue (by Richard TWUM, Volta Basin Development Foundation, Ghana)*

*2.2 The Nakambe Basin Committee (by Dibi MILLOGO, Director General, Nakambe Water Agency)*

*2.3 The Seine-Normandie Basin Committee (by Andre WULF, Seine-Normandie Water Agency, France)*

*2.4 Strengths and Weaknesses of Participative Management in the Water Sector of Member States (National Representatives of Benin, Burkina-Faso and Cote d'Ivoire)*

### **3. Session 3: Tools for Collaborative Management of Water Resources and Associated Ecosystems**

*3.1 Water Charter and Master Plan of the VBA: Challenges and Opportunities for the basin (by Ag Executive Director)*

3.2 *Highlights of Water Charters of African basins (Niger, Chad, Senegal) and their Adoption Process (by Prof. Amidou GARANE, University of Ouagadougou)*

3.3 *Strengths and Weaknesses of Participative Management in the Water Sector of Member States (National Representatives of Ghana, Mali and Togo)*

The sessions were co-chaired by Dr. Charles BINEY, Ag Executive Director of VBA and the following, respectively:

- Session 1: Mr. Mahamane TOURE, representative of ECOWAS/CCRE;
- Session 2: Mr. Abdoulaye TRAORE-ZAKARI, Chairman of the National Water Partnership of Togo;
- Session 3: Dr. Michael TOZAN, National Focal Point of Cote d'Ivoire;

Each session was characterized by discussions among the participants who came up with questions, expressed their concerns and/or commented on the subject matters raised in the sessions.

The highlights of the discussions on each session are summarized as follows:

Session	Overview of Session	Summary of Issues raised
<p><b>Session 1 :</b> <b>Presentation of VBA (by the VBA)</b></p>	<p>The Volta Basin (400 000 km<sup>2</sup>) is unequally distributed among the six States (Burkina and Ghana account for 83% of the basin area). Numerous activities (economic and strategic) and sustainable development challenges (poverty alleviation, environmental protection) characterise the current management context of the resources of the basin.</p> <p>The establishment of the VBA was facilitated by a favourable environment, international, regional (ECOWAS, AU) and local (OMUS, ABN).</p> <p>The current challenges in the operation of the institution relate to difficulties in mobilising resources (financial and human).</p> <p>Several activities have been undertaken since its establishment including consolidation of its institutional framework and priority technical activities.</p> <p>The VBA has a Strategic Plan based on a Vision, Mission and Specific Objectives.</p> <p>The Forum of Parties is a consultative body; its role in relation to the Executive Directorate and composition are defined in the Statutes of the VBA.</p>	<p>The concerns focused on;</p> <ul style="list-style-type: none"> <li>- The nature and profile of the members of the Forum of Parties,</li> <li>- Difficulties in recovering the financial contributions from the States and its consequences on the functioning of the institution,</li> <li>- Establishment of national stakeholders' fora.</li> </ul> <p>The creation of national stakeholders' fora will thus be subject to payment of financial contributions by VBA Member States especially when only one of the 6 was in good standing.</p>
<p><b>Session 2 :</b> <b>Participative Management, Sharing of Experiences</b></p>	<p>Three presentations were made during the second session on sharing of experiences in participative management of infrastructure, sub basins and implementation of national policies on water resources management.</p> <p>It may be noted that there are differences in the characteristics of basin organization even in the same countries although their missions remain the same and are based on the following three key principles:</p> <ul style="list-style-type: none"> <li>- Management by hydrographic basin ;</li> <li>- Consultative management; and</li> </ul>	<p>The major concerns were on:</p> <ul style="list-style-type: none"> <li>- Conflict management experiences in the case of Seine-Normandie,</li> <li>- Managing conflicts between the state institutions and Water Agencies (the case of Benin).</li> <li>- Establishment of a follow-up mechanism on performance indicators in the basin.</li> </ul>

	<p>- The Polluter Pays Principle.</p> <p>On this occasion, the countries of the Volta Basin learnt from the long experience of the Seine Normandie Water Agency.</p> <p>It may also be noted that progress in implementing national IWRM policies and participative management in the water sector is quite diversified. However, there have been significant advances in implementation of IWRM policies especially in the elaboration of national IWRM plans and the ongoing institutional reforms.</p>	
<p><b>Session 3: Tools for Collaborative Management of Water Resources and Associated Ecosystems</b></p>	<p>There were two presentations in this session followed by the feedbacks from the other three countries of the basin.</p> <p>We can conclude from the two presentations that all the countries are focalizing on how to improve upon water resources management and that the big challenge is how to establish collaboration tools specific to each basin. In this way, the charter is a tool for the harmonisation of water policies within the basin.</p> <p>In this context, the salient points of the Charters of the ABN and Lake Tchad were presented by Prof. GARANE who made it clear that the charter aims at reinforcing the basic international conventions and that the Charter in itself does not define all the rules on water resources management. Hence, the interest in developing specific annexes.</p>	<p>Several questions were asked on the Water Charter. It may be noted that the terms <i>treaty, charter or convention</i> are admissible in international law (of water) with the same compelling characteristics.</p> <p>On the other hand, non-binding /conventional documents are called declarations or agreements.</p> <p>Hence the subsequent question on who would be responsible for enforcement of the charter in view of the inability of the countries to conform to its stipulations.</p> <p>To this question, some proposed the establishment of an inspection mission for ensuring adherence to the obligations of the charter by signatory countries.</p>
	<p>The proceedings of the day ended with exchanges of ideas on the role of the basins' committees in the elaboration of the Charter. This role, notably as far as the stake holders' forum is concerned, is divided into three components, namely:</p> <ul style="list-style-type: none"> <li>- elaboration of the terms of reference,</li> <li>- definition of the means to be put in place (human, technical and financial),</li> <li>- definition of the means regarding implementation and operations.</li> </ul>	<p>On this last point, the exchanges centered on the necessity to put all stakeholders at the same level in terms of existing information and separate the question on the establishment of the Forum from that on the elaboration of the Charter, which will take into consideration the shortcomings of the VBA's convention.</p> <p>Concerns on the non-ratification of international treaties (1997 United Nations Convention), which governed the adoption of Charters, were discounted because the present Charter will be based on international conventions.</p>

### 3. Working Session – Day 2

Two sessions were held on the second day as presented below. These were followed by the Closing Ceremony of the Forum.

#### 1 *Session 4: Tools for Collaborative Management of Water Resources and Associated Ecosystems (continuation)*

1.1. *West African Water Resources Policy (Presented by representative of ECOWAS)*

1.2. *The Management of Akosombo (presented by representative of the Volta River Authority)*

1.3. *The Process of Dialogue on Large Dams in West Africa (presented by representative of IUCN)*

*This section also included a presentation on the SDAGE process and the role of the basin committees, by the Seine-Normandie Water Agency.*

#### 2. *Session 5: Functions of the Forum of Parties, developed by the VBA through the presentation of the Draft Statutes of the Forum of Parties.*

Session 4 was chaired by Mr. Ben AMPOMAH, National Focal Point of Ghana and also by Dr. Charles BINEY, Ag Executive Director of the VBA. Session 5 was chaired, co-chaired and facilitated by Messrs Charles BINEY and Yao ATIKPO, Executive Director and Deputy Executive Director, respectively.

The highlights of the discussions were as follows:

Session	Overview of Session	Summary of Issues Raised
<b>Session 4 : Tools for Collaborative Management of Water Resources and Associated Ecosystems</b>	<p>The West African policy on water resources was presented through the different stages of its development:</p> <ul style="list-style-type: none"> <li>- Basis of the policy, which is linked to the ECOWAS Treaty and Statutes of the Permanent Framework for Coordination and Monitoring of IWRM,</li> <li>- Elaboration process based on a participative approach and in collaboration with ECOWAS and UEMOA that made it possible to harmonise the policies,</li> <li>- Legal value of the water policy which is binding in character without recourse to ratification by member states (in conformity with the new legal status of the ECOWAS),</li> <li>- <b>Strategic outlines which seek to</b> i. Reform water management, ii. Promote investments in the water sector, iii. Promote regional cooperation and integration.</li> </ul> <p><b>The modalities for implementation define:</b></p> <ul style="list-style-type: none"> <li>- The institutional provisions,</li> <li>- The financing mechanism,</li> <li>- Mechanism of monitoring and evaluation,</li> <li>- The action plan.</li> </ul>	<p>The discussions focused on:</p> <ul style="list-style-type: none"> <li>- The Framework Directive of ECOWAS on the large infrastructure will ensure the implementation of recommendations of Environmental Impact Studies in the operation of large hydraulic infrastructure;</li> <li>- The new ECOWAS legal system will correct cumbersome administrative procedures in the integration process by making the community mechanisms binding even without ratification by Member States.</li> </ul>

	<p>The exposé on management of the Akosombo Dam made it possible to understand the rules on the management of the resource and the modalities governing collaboration between the stakeholders and other players.</p> <p>It is also important to note the existence of a platform for the exchange of ideas between VRA and SONABEL (Ghana/Burkina) in which all the different technical partners take part.</p> <p>A film (short version) on the process of dialogue on the large dams, showed the need for participative management of these infrastructure, the results of which have, so far, not been well assessed from the human and environmental perspectives.</p>	<p>Contributions were made on finding amicable solutions for resolving controversy between VRA and SONABEL: permanent dialogue, direct contacts and exchange of information (with respect to the Bagré reservoir).</p>
	<p><b><i>The SDAGE process and the role of Basin Committees (Seine Normandie, André WULF, Consultant)</i></b></p> <p>The SDAGE process of the Seine-Normandie Agency was consolidated in time through enacting of successive laws and taking into account of such key objectives as the definition of the good state of waters and extreme events (flooding/draught).</p> <p>The SDAGE is frequently updated following the orientations of the Basin Committee through the advice of experts, the permanent interaction between the different stakeholders.</p>	<p>Some questions made it possible to among others, understand the link between the SDAGE, SAGE and a river contract, while specifying that the river contracts were part of the old system.</p> <p>It was also explained that the Basin Committee is a policy body, which meets four (4) times a year to review documents submitted by the Water Agency that is a regular and permanent technical body.</p> <p>The different challenges due to water pollution are an historical fact related to the occurrence of pollution events</p> <p><b><i>We note from these discussions that the VBA's Strategic Plan includes in its priorities the elaboration of the SDAGE, taking into consideration existing studies. As for the Forum of Parties, it must be involved in the drafting of the ToR, which shall specify the role of the Forum</i></b></p>
<p><b><i>Session 5 :</i></b></p>	<p>The initial review of the preliminary draft of the Statutes focused on major issues related to limited representativeness of participants.</p>	<p>The review was done article by article, which led to several proposals for amendments to various articles including the proposal to combine Articles 3 and 4 and clarify further Articles 5 and 7.</p>

#### **4. Recommendations:**

The various recommendations were integrated in the final communiqué of this 1<sup>st</sup> meeting of the VBA's Forum of Parties.

#### **5. Closing Ceremony**

The closing ceremony was marked by statements by the Deputy Permanent Secretary of the International Network of Basin Organizations, Mr. Alain BERNARD, the Regional Advisor of ECOWAS/UEMOA, Mr. Nicolas LECRIVAIN of the French Embassy and the Ag Executive Director of the VBA, Dr. Charles BINEY.

In his address, the RIOB representative noted the already long cooperation between VBA and RIOB and was delighted for the new cooperation up to 2015 through the Water Facility project for the strengthening of VBA's management. He also praised the vision of the founding provisions of the VBA, which include the creation of the Forum of Parties Involved in the Development of the Basin, an advisory body to the Council of Ministers. After congratulating the meeting for the smooth manner in which it was held, which is encouraging for the future of the VBA, he however stressed that while the requirement to concretely involve users, civil society and communities would complicate the process and had its costs, not associating them would be even more costly, thus reiterating the fact that participative management was the best guarantee for a real appropriation of management of water resources and facilitating operational actions; furthermore, he encouraged the VBA to promote the equitable sharing of the benefits of management of water resources and the concerted exploitation of infrastructure. He then concluded by assuring the VBA that it could count on RIOB, RAOB, OIEau and the French Water Agencies to continue to support its actions and urged all participants to prepare to continue the interaction soon in Marseille within the framework of the 6<sup>th</sup> World Water Forum.

The representative of the French Embassy, Mr. Nicolas LECRIVAIN, then noted and congratulated VBA for the important role it is playing in the regional integration process, which France supports. The Ag executive Director, Dr. Charles BINEY congratulated all for the success of the 1<sup>st</sup> meeting of the Forum of Parties.

The Chairman of the Meeting

Dr. Charles BINEY, Acting Executive Director

**Draft Agenda**

<b>18 January 2012</b>	
08h30-09h00	Arrival and Registration of Participants
09h00-10h00	<b><i>OPENING CEREMONY</i></b> i. Welcome Statement by Ag. Executive Director, VBA; ii. Statement by Chairman, Global Water Partnership/West Africa; iii. Statement by Representative of France (Embassy /AFD); iv. Statement by Representative of Delegation of the European Commission; v. Opening Address by Chairman of the VBA Council of Ministers, HE Minister of Agriculture and Water Resources of Burkina Faso
10h00-10h30	Coffee Break
10h00-10h45	Introduction of Participants Adoption of Agenda Establishment of Secretariat

10h45-11h30	<p><b><i>SESSION 1: Introduction of VBA by the Executive Directorate</i></b></p> <p>i. Presentation of VBA: Statutes and Mandate, Strategic Plan, Role and Responsibilities of the Forum of Parties, by Ag. Deputy Executive Director</p> <p>ii. Context and objectives of the 1<sup>st</sup> Forum of Parties, by Ag. Executive Director</p>
11h30-13h00	<p><b><i>SESSION 2: Participative Management: Sharing of Experiences</i></b></p> <p>i. Ghana Dams Dialogue, by Richard TWUM (Volta Basin Development Foundation, Ghana);</p> <p>ii. The Nakambé Basin Committee, by Dibi MILLOGO (Agence de l'Eau du Nakambé, Burkina) ;</p> <p>iii. The Seine Basin Committee, by the representative of Agence de l'Eau Seine Normandie, France;</p> <p>iv. Strengths and Weaknesses of Participative Management in the Water Sector of Member States by national representatives (Bénin, Burkina Faso, Côte d'Ivoire)</p> <p>v. General discussion</p>
13h00-14h30	Lunch
14h30-16h00	<p><b><i>SESSION 3: Tools for Tools for Collaborative Management of Water Resources and Associated Ecosystems</i></b></p> <p>i. Water Charter and Master Plan: Challenges and Opportunities for the Basin, by Ag. Executive Director;</p> <p>ii. Highlights of Water Charters of African Basins (Niger, Chad, Senegal) and their Processes of Adoption, by Prof. H. Garane, University of Ouagadougou;</p> <p>iii. Role of Basin Committees in the Development of Water Charter for Transboundary Basins, by INBO Representative;</p> <p>iv. Strengths and Weaknesses of Participative Management in the Water Sector of Member States by national representatives (Ghana, Mali, Togo);</p> <p>v. General discussion</p>
16h00-16h30	Coffee Break
16h30-17h30	<p>Discussion – Involvement of the Forum of Parties in the Development of a Water Charter for the Volta Basin – Moderated by Participative Management Expert from INBO;</p> <p>End of Session</p>

**19 January 2012**

09h00-10h30	<p><b><i>SESSION 4: Tools for Collaborative management of Water Resources and Associated Ecosystems</i></b></p> <p>i. Water Resources Policy of West Africa, by Representative of ECOWAS/ WRCC;</p> <p>ii. Operations and Management of Akosombo Dam;</p> <p>iii. Operations and Management of the Bagré et Ziga Dams, by Director General of Water Resources, Burkina Faso;</p> <p>iv. Role of Basin Committees in the Development of a Master Plan, by Representative of Seine Normandie Water Agency;</p> <p>v. General discussion</p>
10h30-11h00	Coffee Break
11h00-12h00	Discussion – Involvement of the Forum of Parties in the Development of a Master Plan for the Volta Basin – Moderated by Participative Management Expert from INBO.
12h00-13h00	<p><b><i>SESSION 5: Operations of the Forum of Parties, by the Ag. Executive Director of VBA</i></b></p> <p>i. Examination of the Preliminary Draft Statutes of the Forum of Parties;</p> <p>ii. Discussion on Improving the Statutes for the Operation of the Forum of Parties.</p>
13h00-14h30	Lunch
	Drafting of Recommendations, Final Communiqué; and Report.
16h00-17h30	Presentation and Approval of Recommendations, Final Communiqué and Report
17h30-18h00	<p><b><i>CLOSING CEREMONY</i></b></p> <p>i. Statement by Representative of International Network of Basin Organizations</p> <p>ii. Statement by Ag. Executive Director of VBA;</p> <p>iii. Closing Speech by Representative of the Chairman of the VBA Council of Ministers.</p>
	<b><i>Cocktail</i></b>

<b>19 January 2012</b>	
9-10:30 am	<p><b><i>SESSION 4: Concerted management tools of the water resources and allied sectors.</i></b></p> <p>West African Water resources policy, by Mahamane TOURE, the representative of ECOWAS/CCRE ;</p> <p>The management of Akosombo, by Charles ADO, representative of the Volta River Authority (VRA) - Ghana;</p> <p>Screening of the film « Les grands barrages en Afrique de l'Ouest – Bâtir le Dialogue » (West African great dams – Dialog building), by Jérôme KOUNDOUNO, representative of UICN</p> <p>Discussions</p>
10:30-11 am	Coffee Break
11-12 pm	<p>The SDAGE process and the role of the basins' committee, by André WULF, representative of the Seine Normandie Water Agency;</p> <p>Debate on the theme « Preparation for the Stakeholders' Forum, its implications in the Volta Basin's Master Plan Process», facilitated by Alain BERNARD, representative of RIOB, Charles BINEY, Acting Executive Director of the VBA and Ben AMPOMAH, National Focal Point of Ghana</p>
12-1 pm	<p><b><i>SESSION 5 : Functioning of the Stakeholders' Forum, by the acting Executive Director of the VBA</i></b></p> <p>Presentation of the Internal Regulations Project of the Forum;</p> <p>Debate</p>
1-2:30 pm	Lunch Break
	Preparation of the recommendations, the final communiqué and drafting of the report by the bureau
4-5:30 pm	Presentation and approval of the recommendations, the final communiqué and the report (plenary session)
5:30-6pm	<p><b><i>CLOSING CEREMONY</i></b></p> <p>Address by the Representative of the International Network of the Organs of the Basin (RIOB) ;</p> <p>Address by the acting Executive Director of the VBA;</p> <p>Closing remarks by the representative of the Chairman of the Council of Ministers of the VBA.</p>
